

## Backup as a Service

Secure, Scalable, and Seamless Data Protection - Compliant Backup as a Service Built for complete Cyber Resilience.

Cyberfort Backup as a Service gives end-to-end encryption from our UK based data centres resulting in enhanced protection with comprehensive monitoring and data control.

## Protect and preserve your data to stay compliant, resilient and maintain data integrity.

Cyberfort Customer Backup Service (CBS) delivers ultra-secure, scalable cloud backup solutions with an intuitive client interface, offering reliable backup for any environment. Hosted in UK-based Data Centers, CBS provides unlimited storage and competitive pricing.

With built-in immutability and ransomware protection, your data is safeguarded from unauthorised changes or deletions, ensuring rapid and confident recovery in case of an attack.

Supported by 24/7/365 technical experts with a choice of managed or unmanaged service options, CBS guarantees seamless data protection and quick recovery, all without the complexity of managing additional on-premise backup infrastructure.

Every organisation, large or small needs to back up their data regularly to avoid losses, stay compliant and preserve data integrity with Cyberfort CBS.

## Features

-  **End-to-end Encryption:** All data protected with AES-256 encryption at rest, at source and in flight through a secure SSL connection
-  **Simple Management:** Access and recover your data directly using your intuitive centralised management console
-  **Comprehensive Monitoring:** Gain control over your data with powerful monitoring and analytics including personalised reports

Over 20 years of experience delivering managed services

Our team is skilled across leading cloud platforms with certifications

Trusted to deliver resilient, scalable and tailored solutions

## Key Benefits

-  **Enhanced Protection:** Immutability prevents unauthorised changes, protecting from ransomware attacks.
-  **Predictable Costs:** Scalable, consumption-based pricing ensures predictable costs that align with your business needs
-  **Data Sovereignty Compliance:** Ensure data remains within the UK, meeting regulatory and legal requirements
-  **Automatic Backups:** Automated backups ensure consistent protection without manual intervention or human error
-  **Faster Recovery:** Rapid recovery processes with granular recovery minimise downtime and get your business back on track quickly
-  **Scalable Storage:** Easily scale storage as your business grows, without managing physical infrastructure
-  **Expert Support:** 24/7/365 professional support ensures prompt resolution of issues, allowing you to focus on business

As a Veeam Gold Service Provider, Cyberfort can provide tailored expertise to secure, protect and restore your data.
