Cyberfort | Vanta

Fast track your path to international growth

Vanta accelerates ISO 27001 compliance

Streamline your ISO 27001 certification process

Considered the international gold standard for information security management, ISO 27001 is essential for companies looking to kickstart their next phase of growth across Europe and other global markets.

However, getting ISO 27001 certified can require 400+ hours of preparation and manual evidence collection. Between that, hitting revenue targets, and product innovation,teams simply don't have enough time left or resources left to dedicate to running their businesses.

Enter Vanta, is the easiest way to automate up to 80% of the testing and evidence collection required to achieve ISO 27001 certification—at a fraction of the cost. Vanta helps you define policies based on security, not just compliance—saving you dozens of hours on Add Information Security Management Systems (ISMS) policy design.

Mitigate risks to your business with Vanta's ISO-aligned risk assessment, which surfaces security threats and guides you through the steps to remediate them. With 80+ integrations and a Connectors API, Vanta integrates with the tools you already use, so you can spend less time on compliance and more time growing your business.

Automate up to

80%

of the testing and evidence collection required to achieve ISO 27001 certification

ISO 27001 Powered by Vanta

"The problem that we are solving with Vanta is that [our] engineers can't interpret ISO requirements… Vanta does the translation between requirements and actionable tasks."

Streamline and automate ISO 27001 compliance with Vanta

Easily design unique security policies and controls

Choose from over a dozen customisable templates to help define the scope of your ISMS, assign roles and responsibilities, identify risks and vulnerabilities, implement mitigation measures, and explicitly demonstrate your organisation's compliance with the requirements of ISO 27001.

Track compliance progress in one place

Vanta provides a centralised view into the status of your security and compliance program. Get alerts when things fall out of compliance, assign tasks to owners, and remediate issues.

Connect your tools for continuous monitoring

With **80+ integrations** and a **Connectors API**, Vanta integrates with the tools you already use, such as cloud service providers, task-trackers, mobile device management software (MDMs), and more. Once integrated, Vanta automatically starts to collect evidence.

Mitigate complex security risks

Vanta's ISO 27005-aligned Risk Management solution enables businesses of all sizes to reduce risks to the business and critical data, while significantly improving compliance and security posture.

Showcase your commitment to security and privacy

As your security and privacy programs evolves, Vanta has you covered. We support a whole suite of ISO standards, including ISO 27701, ISO 27017, and ISO 27018.

Guidance and expertise every step of the way

Vanta comes with a team that walks you through every step of the certification process and beyond, including a dedicated Customer Success Manager, in-house audit specialists, and our Product Support team.

Over 4,000 companies rely on Vanta to automate security and compliance

"If you're considering ISO 27001 and want great support from a technical and process viewpoint...
Vanta is that solution and does so much of the heavy lifting for you and manages it for the long haul."
