

Cyberfort & Vanta for Government

Software for Cybersecurity Trust Management

Governance, Risk, and Compliance (GRC):

Streamline evidence collection to verify controls across 35+ cybersecurity frameworks, moving beyond point-in-time assessments to continuous monitoring and risk management.

→ Frameworks supported include SOC, ISO, NIST, HIPAA, CMMC, FedRAMP

Continuous Risk Monitoring

Automation and AI-enabled software can give agency CIO and CISOs the ability to continuously monitor—and, if necessary, remediate—cybersecurity risk and compliance, for both government agencies and their third-party commercial vendors.

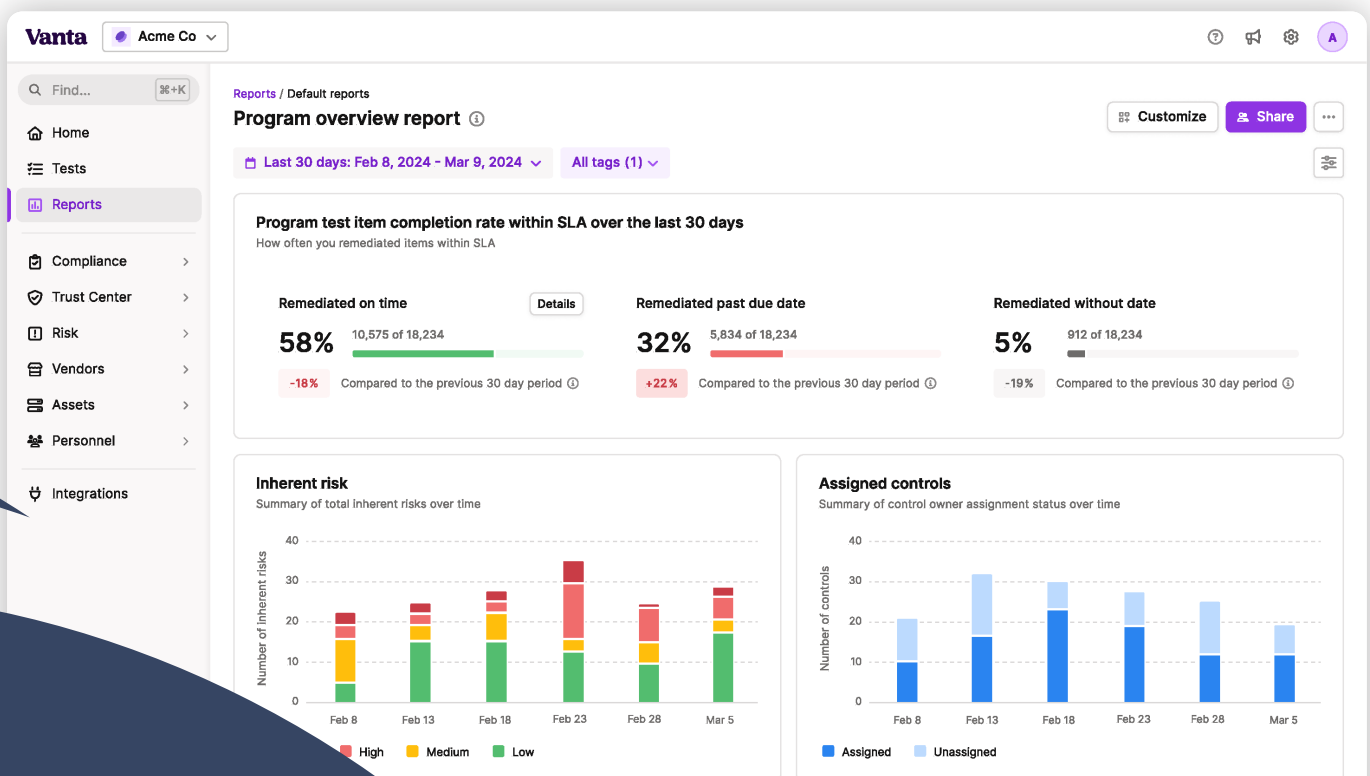

Vendor Risk Management

Automate vendor onboarding, risk assessment, and remediation so organisations can spend less time on vendor reviews and more time strengthening security.

About us

Founded in 2018 in the wake of several high-profile data breaches, Vanta's mission is to secure the internet and protect customer data by helping enterprises leverage the benefits of automation and continuous monitoring. Vanta's AI-enabled software empowers organisations to achieve and maintain compliance, manage risk, and build trust across the cybersecurity landscape with greater efficiency and effectiveness.

Cyberfort is an all-encompassing Cyber Security services provider. We are passionate about the cyber security services we deliver for our customers which keeps their people, data, systems and technology infrastructure secure, resilient and compliant.

Benefits to Government

Strengthening Cyber Workforce

AI-enabled software can improve cyber workforce productivity, simplifying the most manual and mundane tasks, and thus allowing cyber professionals the ability to do more with the resources they have.

Securing Supply Chains

Real-time, AI-driven visibility into the cybersecurity posture of third-party vendors helps government agencies safeguard their supply chain against cyber risks.

Expanding the Industrial Base

Reducing the complexity and cost of compliance helps more commercial innovators meet the necessary requirements to serve government customers, while also freeing their energy to focus on critical public sector needs.

IT Modernisation and Procurement

AI-enabled software helps organisations reduce the time, cost, and complexity of security audits, evidence collection, and compliance monitoring as part of technology onboarding, allowing for speedier procurement and ATO timelines.

Continuous Risk Monitoring

Automation and AI-enabled software can give agency CIO and CISOs the ability to continuously monitor and, if necessary, remediate cybersecurity risk and compliance, for both government agencies and their third-party commercial vendors.

Trusted by over 10,000 companies

Vanta serves over 10,000 global organisations, including startups, small and medium-sized businesses, enterprise healthcare and transportation organisations, and government contractors. Vanta customers achieve a 526% 3-year return on investment, 129% more productive compliance teams, 56% more efficient IT management teams, and 54% more productive third-party risk management teams.

Automate compliance. Simplify security. Demonstrate trust.

Cyberfort's accredited Governance, Risk and Compliance consultants help organisations to configure and manage the Vanta platform to ensure data protection policies, systems and processes are up to date and aligned with regulatory standards including ISO 27001, ISO 42001, DORA, GDPR, NIST CSF 2.0, and SOC2.
