

Delivery of IT Security Initiatives to a Leading Insurance Underwriter

Based in London and listed on the London Stock Exchange, this leading Insurance underwriter uses its insight to deliver excellence and achieve success across the risk taking insurance business. Our client operates at Lloyd's of London through its underwriting syndicate as part of the Lloyd's market, and enjoys the overall A (A.M. Best) and A+ (Standard & Poor's; Fitch) Lloyd's ratings.

Industry:
Insurance

Location:
London,
United Kingdom

The client underwrites a mix of short and long-tail business. The Group employs approximately 650 people based in London, Zurich, Australia and America. Cyberfort has been working with this client as a valued IT security partner of choice since 2012, and has implemented many important IT security services on the client's behalf to further strengthen their overall IT security posture in a complex and everchanging business environment.

Key Projects Undertaken Include:

- Writing of all corporate-wide IT security policies
- Education and Training to all 650+ staff globally
- Architecture & Infrastructure review and analysis
- Development of Active Directory
- Full review of client IT strategy, gap analysis, recommendations and required remediation
- Writing of a worldwide Employee Handbook
- Full Web Application Penetration testing of critical applications
- Complex review of client software applications and source code review
- Policy review for BYOD (Bring Your Own Device)

Cyberfort has a full-time Senior Consultant on the client site providing daily support, recommendations and remediation as well as bringing together the full support and experience of the Cyberfort team to deliver complex IT security consulting services.

The Results

Full project management and resource planning, combined with Cyberfort best practice, enabled us to consistently deliver quality on all assignments, on time, every time, and always within budget.

'We are very proud of the continuing improvements we are making to consistently improve our overall IT security posture. Our clients demand confidentiality and security of their data and financial transactions and assurances that we are compliant with all current regulations. By working closely with Cyberfort we are ensuring that we have an active program of continuous improvement based on their experience and our needs. We believe we could not have achieved the level of success we have without the advice, support and guidance of the Cyberfort team of experienced consultants. Cyberfort's attention to detail, customer satisfaction, experience, knowledge, quality and consistency has enabled my team to align our IT strategy to our business strategy providing us with real TCO and ROI.'
